

Basic Binomial Worksheet

Match the biology terms in Column A with their correct definitions in Column B.

Column A: Biology Words	Column B: Definitions
1. Mitochondria	A. Community of organisms interacting with their environment
2. Photosynthesis	B. Protein that speeds up chemical reactions
3. Osmosis	C. Process by which plants make food using sunlight
4. Chlorophyll	D. Movement of water across a semi-permeable membrane
5. Homeostasis	E. Green pigment responsible for photosynthesis
6. Nucleus	F. Structure that controls what enters and exits the cell
7. Enzyme	G. Control center of the cell containing genetic material
8. Cell membrane	H. Powerhouse of the cell, produces energy
9. DNA	I. Genetic material carrying instructions for life
10. Ecosystem	J. Maintaining a stable internal environment

Basic Binomial Worksheet

Answer Key

1. Mitochondria -> H
2. Photosynthesis -> C
3. Osmosis -> D
4. Chlorophyll -> E
5. Homeostasis -> J
6. Nucleus -> G
7. Enzyme -> B
8. Cell membrane -> F
9. DNA -> I
10. Ecosystem -> A
